

Family Restrooms and Lactation Rooms in City Hall

The Commission for Women has spearheaded two projects to make City Hall more accessible and family-friendly: two single-room “family” restrooms, complete with diaper changing stations and accessible facilities, and lactation rooms for nursing mothers.

The restrooms, on the first floor of the City Hall building (across the Atrium from the City Council Chamber), provide facilities for people of all ages and physical abilities.

Additionally, the city has designated two rooms in the City Hall complex for use by city employees and City Hall visitors for lactation (breastfeeding and pumping). These quiet rooms with comfortable amenities lock from the inside for privacy and security. To use these rooms, members of the public may contact the City Manager’s Office, Room 316 in City Hall at 703-385-7850.
